

SRIJITH S BHAT

shrijithbhat@gmail.com | Bengaluru, Karnataka, India | [LinkedIn](#) | [GitHub](#)

Full Stack Software Development Engineer with ~4 years of experience building scalable end-to-end web applications, microservices, and modern AI-driven solutions. Specialized in Python, Flask, AI integrations, Agentic AI, LLM Harness Engineering, etc. Proven track record of taking owning, architecting backend systems from scratch, database table schemas, designing data-driven backends, AI agents, and automating deployment pipelines in high-availability enterprise environments.

PROFESSIONAL EXPERIENCE

Software Development Engineer *Trellix*

Oct 2024 – Present
Bengaluru, India

- Designed and developed backend and frontend for interactive AI chat for EDR, with modern UI with auto-scrolling, markdown rendering, and streaming APIs and prompts, leveraging AI (Claude code).
- Architected multi-step Agentic AI workflows and LTMS using LangChain, LangGraph, Python, and AWS Bedrock to improve complex threat analysis tasks in EDR.
- Built real-time AI response streaming features across the frontend (TypeScript, Angular) and backend (Python, Flask), drastically reducing user-perceived waiting time and enhancing UX.
- Scripted multi-region automated telemetry data extractions from Prometheus; diagnosed production logs and constructed monitoring dashboards with Kibana and Grafana.
- Built end-to-end full stack genAI Feedback Dashboard (Python, Streamlit, MySQL, S3) to track user inputs to improve the genAI integration.
- Led SDLC of monthly releases of microservices, improved the processes with automations and vulnerability tracing dashboards.

Software Engineer *nFolks Data Solutions*

Aug 2022 – Oct 2024
Hyderabad, India

- Architected the frameworks for GenAI integration, SQL editors, and Secret Manager within the Datadogs ecosystem.
- Initiated, designed and built full stack SQL Editor using React.js on the frontend and Python on the backend.
- Integrated GenAI to SQL Editor with OpenAI LLMs on LangChain to generate SQL queries from natural language.
- Implemented an asynchronous Metadata Sync engine supporting PostgreSQL, AWS Redshift, and Snowflake with Async APIs, custom data-type mapping frameworks, and batch processing.
- Developed multiple REST APIs with new feature implementations. Improved code quality with e2e and unit testing enhancements.
- Led multiple enterprise client's on-prem deployments with using Docker and Podman across ubuntu and RHEL servers.
-

Designed and optimized multiple Jenkins and Bitbucket pipelines to make the testing and deployment on multiple servers fully automated and significantly faster by at least 70%. Added Webhooks for Outlook and bitbucket integrations for automation.

- Designed and implemented scalable generic cloud integration framework for easy user cloud configuration and integration

Trainee Engineer Intern

nFolks Data Solutions

Apr 2022 – Jul 2022

Hyderabad, India

- Contributed to backend of the DataDios product; gained proficiency in Git, Docker, and RESTful architecture.

Software Developer Intern

TechCiti Software

Aug 2021 – Sep 2021

Bengaluru, India

- Gained hands-on experience on the basics of full stack web development using HTML, CSS, and JS.

PROJECTS & PUBLICATIONS

Kannada Sign Language Recognition

July 2022

AI/ML Full Stack Tool

- A real-time Kannada Sign language detection application (Python, OpenCV, Flask, HTML/CSS/JS) trained on 15,000+ custom gesture datasets. Conducted a case study on a student from AIISH, Mysuru.
- Published Research Paper: "Implementation of Kannada Sign Language Recognition using Machine Learning" in IJARCCCE.

Telegram bot for Indian Supermarket store

June 2026

AI agent bot

- A telegram AI bot with harness, with database CRUD operation tools for easy natural language command-based inventory, account and invoice management, GSTinvoice and sales PPT generations. (Python, Gemini SDK, AI agents, Harness, Telegram API)
- Used Google Antigravity AI as a leverage to make fast paced progress.

Telegram drive

June 2026

In progress

- Online drive like interface to store files in telegram storage. Files will be uploaded to saved messages or a specified chat and retrieved through Telegram APIs (Python, React, Vite, Telegram API)

Bidirectional visitor counter with limit

Aug 2021

Arduino based sensing system

- Counts the no. of visitors entering & leaving the room using IR sensing mechanism. Integrated buzzer with limit trigger. (Arduino IDE)

EDUCATION

B.E. in Electronics & Communication Engineering

2018 – 2022

NIE Institute of Technology, Mysuru

CGPA: 8.49 / 10. Leadership: Treasurer, IEEE Student Branch (2020 – 2022)

12th | Science (Electronics)

2018

Poorna Prajna PU College, Udupi

Percentage: 87

10th

2016

Adarsha Vidyalaya, Mysuru

Percentage: 96.5
